19 December 1958

MEMORANDUM FOR: Special Assistant to the Director
for Planning and Development

SUBJECT: Need for Hyeon Personnel at [redacted]

25X1

1. With the last red-dot test scheduled for December 1958, and with the imminent completion of all camera shake-down tests for FGI at [redacted] and with the shelving of all "C" camera tests by FGS, we have no need for a permanent detachment of Hyeon personnel [redacted] at [redacted]

25X1

2. Accordingly, with concurrence by [redacted]

25X1

[redacted] I have asked the Contract Office to revise Hyeon's contract to eliminate the expense of this service. Henceforth all camera flight tests at [redacted] will be on demand of the Commander [redacted] to Hyeon with camera technician services being furnished by Hyeon on a TDY basis. Such TDY personnel would be persons available from the M & G line in Hyeon.

25X1

3. Consideration is also being given to what position Hyeon should maintain regarding training of cadre in place of technicians as replacement overseas, when required.

4. The above retrenchment will be discussed with Hyeon by members of the Contract Office and by the DPO [redacted] at an early date. Preliminary suggestions have already been made to Hyeon and their initial reaction is somewhat negative. However, in view of our diminished requirements and need for saving funds wherever possible without damage to the program, I recommend we do all trimming possible in this area.

25X1

15 /
[redacted]
Director, D & P, NSA/DCI
